## SUMMARY

Frontend-focused full-stack developer with 2+ years of production experience, 1.5 years of them on a hotel guest-experience SaaS used by 800+ hotels across the EU, UK and Canada. I ship end to end: Vue and React frontends, Laravel/PostgreSQL APIs, real-time features over WebSocket, AI voice and chat integrations, and Flutter releases to the App Store and Google Play. Two modules I built were included in the company's enterprise contract with Accor. Comfortable owning a feature from spec to production in a small remote team.

## EXPERIENCE

### Software Developer — DGSTAY / 2ROOMZ

Jun 2025 – Present

DGSTAY OÜ, Estonia · Remote · Hotel guest-experience SaaS, 800+ hotels in the EU, UK and Canada

- Built the Task Management and Lost & Found modules (Vue); both were included in the company's enterprise contract with Accor.
- Built guest-to-reception calling with Twilio Voice and an ElevenLabs AI receptionist that escalates to a human SIP phone; shipped to production hotels.
- Led security remediation before an acquisition audit, cutting known vulnerabilities from 214 → 5 (Vue 2 guest app), 86 → 36 (admin panel) and 49 → 0 (React app).
- Own the Flutter admin app (app2roomz): run App Store and Google Play releases solo; fixed iOS audio and cross-platform voice-message playback.
- Improved the real-time guest chat (Vue 2) and added Redis caching to its translation service, cutting Google Translate API spend.
- Fixed production issues across the stack: spa overbooking, checkout data bugs, phone-number corruption and Centrifugo WebSocket outages.

### Web Developer & IT Specialist — NamDTU (Namangan State Technical University)

Sep 2024 – Apr 2025

- Developed and maintained the university's web systems (namdtu.uz) and built a class-schedule system for students.

### Frontend Developer (Internship) — teamly.uz

Jan 2023 – Mar 2024

- Built the company website with Vue 2/3 and Firebase, using Pinia and Vuex for state management.

## SELECTED PROJECTS

### HairDraft — AI hair-styling preview for salons

Vue 3 · Go · PostgreSQL · Gemini · GCP

- Built Gemini image generation with a 3-layer prompt system and swatch-image color transfer, which fixed color accuracy that text prompts could not.
- Set up the Go backend, admin panel, IP rate limiting and GitHub Actions deploys to Linux/Nginx; the same engine powers a sister product in another market.

### Marianaparfumes.uz — Online perfume store with an AI ordering assistant

- AI chat answers customer questions from the product catalog and places orders end to end inside the conversation.
- Admin panel for products, orders, customer messages and sales statistics.

### quvna.com — Vue 3 web app with Steam payments and Google OAuth

### easyhsk.com — HSK Chinese exam prep: vocabulary and practice tests by HSK level

## EDUCATION

### B.Sc. Software Engineering — Tashkent University of Information Technologies

2020 – 2024

## SKILLS

**Frontend:** Vue 2/3 (Composition API, Pinia, Vuex), Nuxt, React, TypeScript, Tailwind CSS, Vite
**Backend:** Laravel (PHP), Go, PostgreSQL, Redis, REST APIs · **Mobile:** Flutter, Dart (App Store, Google Play)
**Real-time & AI:** WebSocket (Centrifugo, Ably), Twilio Voice, ElevenLabs, Gemini API, LLM chat assistants
**DevOps:** Linux, Nginx, Docker, GitHub Actions CI/CD
**Languages:** Uzbek (native) · English (B1–B2) · Russian (A1)
